

## WHY DO YOU NEED US

Warehouse management is a complex job. Maintaining and monitoring the correct moisture levels and temperature all the time is not easy.

Protecting the commodities from insect infestation, rodents, and microbial activities is essential but you can never do it right manually.

Huge amounts of the stored commodity get wasted and make the warehouse managers incur losses in lakhs of rupees.

## MODERNISE YOUR WAREHOUSES WITH SKYWARE USING AI IOT AND DATA MODELLING

## TESTIMONIALS

Mr. Piyush Goyal

FCI should adopt digital technologies, IoT and AI to improve its functioning.

Central Govt.

The Centre has developed an online portal to collect details about government and private warehouses, a move that will enable monitoring of storage availability on a real time basis.

Real Time Analysis Of Microbial Activities Detects All The Spoilage Possibilities At An Early Stage

Our Systems Analyse Numerous Parameters To Predict Shelf Life And Suggest Ways Of Maximising It

A Score That Tells About The Health Of The Commodity And How Long Will It Survive

An AI Based Assistant Activity Planner For Warehouse Managers That Plans And Suggests The Upcoming Activities

Our Mobile Software Gives Remote Access To The Warehouse And Alerts You In Case Of Any Severe Environmental Change

Motion Sensing Technology Incorporated In Our Devices Make Your Warehouse An Anti-Theft Facility

## ABOUT US

Skyware envisions an IoT and AI based future for post-harvest agri warehousing industry. We provide scientific storage solutions that can help a user to foresee any spoilage of the stored commodity in the warehouses with the help of statistics in real time.
